## Why BS Supply Chain Management?

Our innovative BS Supply Chain Management program:

- Provides students with a comprehensive understanding of supply chain management principles, including logistics, operations, procurement, and distribution
- Has a curriculum designed to align with the latest trends and practices in the supply chain industry
- Incorporates case studies and real-world scenarios to help students understand the challenges and complexities faced by supply chain professionals and overcome them
- Focuses on supply chain technology, data analytics, and the use of software tools for optimization and decision-making
- Ensures that students are familiar with the intricacies of international operations and sheds light on international logistics, trade regulations, and cross-border supply chain coordination
